

Code	Category
	Track B – Clinical science
	Course of HIV disease
B1	Acute and early infection
B2	Impact of co-factors (e.g., viral clade, tropism, genetic factors) on disease progression
B3	Morbidity, mortality and life expectancy in clinical research
	Diagnostic and monitoring tools
B4	Novel assays of immune responses
B5	Novel approaches to assess viral load and ARV resistance/tropism
B6	HIV testing, self-testing and retesting (e.g., point-of-care diagnostics)
B7	Diagnosis of HIV disease in paediatric and adolescent populations
B8	Viral load and CD4 monitoring
B9	Adherence testing
B10	Diagnostics of co-infections and co-morbidities
B11	Biomarkers for the prediction of morbidity and mortality
	Co-infections (including opportunistic infections)
B12	Tuberculosis: Prevention, diagnosis, treatment
B13	Opportunistic infections (excluding TB): Bacterial, non-TB mycobacterial, viral and parasitic infections
B14	Viral hepatitis C and other viral hepatitis (e.g., A, B, D, E)
B15	STIs (including HPV)
	Co-morbidities
B16	Neurologic disorders (e.g. CNS malignancies)
B17	Mental health (including depression and psychiatric manifestations) and HIV
B18	Malignancies (AIDS and non-AIDS)
B19	Cardiovascular disease
B20	Bone disease
B21	Renal disease
B22	Other non-communicable diseases
	Clinical complications of HIV infection and antiretroviral therapy
B23	Metabolic, lipid and endocrine complications (including lipodystrophy)
B24	Weight gain
B25	Hepatic complications (e.g., NASH)
B26	Immune reconstitution disorders/immune reconstitution inflammatory syndrome (IRIS)
B27	Other ART complications and adverse reactions
	HIV and ageing
B28	Polypharmacy
B29	Frailty
B30	Drug-drug interaction (DDI)

B31	Other issues related to aging with HIV
	Antiretroviral therapies in adults
B32	ART in acute, first- and second-line therapies
B33	ART in highly treatment-experienced persons
B34	Regimen simplification and switch studies
B35	Pharmacokinetics/pharmacodynamics/pharmacogenomics and therapeutic drug monitoring
B36	Drug interactions
B37	Long-acting agents and other drug delivery systems (e.g., injectables, implants, dual therapies, microneedle patches)
B38	Adherence
B39	Sex-specific (including cis- and transgender) issues of ART efficacy, adverse reactions and complications
B40	Pregnancy (clinical management issues and pharmacokinetics) and contraception
	Antiretroviral therapies and clinical issues in infants, children and adolescents
B41	Pharmacokinetics/pharmacodynamics/pharmacogenomics and therapeutic drug monitoring in paediatric and adolescent populations
B42	Drug formulations for infants and children
B43	Clinical trials in paediatric and adolescent populations
B44	ARV management strategies in paediatric and adolescent populations
B45	Cure strategies in paediatric and adolescent populations
B46	Adherence in paediatric and adolescent populations
B47	Opportunistic infections in paediatric and adolescent populations
B48	TB/HIV co-infection in paediatric and adolescent populations (including treatment and prevention)
B49	HIV complications and co-morbidities in paediatric and adolescent populations
B50	HIV-associated co-infections and malignancies in paediatric and adolescent populations
B51	Behavioural health outcomes in paediatric and adolescent populations
B52	Mental health and neurocognition in paediatric and adolescent populations
B53	HIV-exposed uninfected children
B54	Transition of adolescents into adult care
	Clinical issues specific to key populations
B55	Clinical issues in gay men and other men who have sex with men
B56	Clinical issues in sex workers
B57	Clinical issues in transgender people
B58	Clinical issues in people who use drugs
B59	Clinical issues in prisoners and other incarcerated people
	Other strategies and therapies
B60	Cure interventions
B61	Complementary and traditional medicines
B62	Nutrition

	HIV resistance
B63	Resistance to ART
	SARS-CoV-2, COVID-19 and HIV
B64	SARS-CoV-2 antiviral therapy in PVH and resistance
B65	Impact of COVID-19 on HIV care
B66	Clinical manifestations and features of COVID-19 and HIV co-infection
